Experience

Microsoft, Waterloo, ON

October 2016 – Present

Microsoft Student Partner (MSP)

- Co-organized Azure Day on campus with other MSPs; designed the poster for the event, promoted the event in person and through social media
- Represented Microsoft at The Lady Hacks 2016: aided hackathon participants in understanding Microsoft Azure, arranged the Microsoft booth, and explained the MSP program and Microsoft initiatives to interested participants
- Engaged in virtual workshops on cognitive services and machine learning with Microsoft Tech Evangelist Yash Manivannan; built technical skills in the above mentioned areas

Freelance Website Design

September 2015 – Present

Website Designer

- Coded numerous websites using HTML, CSS and JavaScript; created engaging websites serving various purposes including e-commerce and educational purposes
- Created and employed animated CSS headers; formed a memorable user experience

Tech Vector, Electronic Office

March 2014

Website Designer

- Designed a logo for a company in Photoshop; effectively represented the company's values and culture
- Redesigned the layout for a company's website using the fundamental principles of design and colour theory

Projects

dariapushkareva.me

January 2017

Personal Website

- Coded personal website using CSS, HTML, and JavaScript; created an online resume effectively showcasing all my work
- Designed a visually appealing user interface using Photoshop and CSS; insured a positive user experience
- Displayed previous work in the Portfolio page, including: several websites, a mobile application, and numerous graphic design projects

MakeApp Your Mind

January 2017

Website Designer

- Programmed an android application using Java and XML; successfully created a tool that helped user make their day to day decisions by asking users questions that they wouldn't normally ask themselves and giving suggestions based on their answers
- Implemented a Google API allowing users to select the closest locations to them from the suggestions given by the app
